The Geneva Foundation is a 501(c)3 non-profit organization that supports innovative medical research within the U.S. military. Geneva builds enduring partnerships dedicated to the health and well-being of service members, their families, and the global community. Established in 1993, Geneva has grown to support medical research at over 55 federal laboratories and military treatment facilities worldwide. Geneva has specialized capabilities in supporting federally-funded research, conducting FDA-regulated clinical trials, and hosting conferences and events. Geneva currently employs over 570 researchers and research professionals active in a wide variety of research areas and scientific endeavors.

Innovation Around the World

Geneva’s global footprint is expanding as we strive to fulfill our mission of advancing military medicine. We are honored to collaborate on orthopedic research at the following U.S. locations:

- AMEDD Center & School
- Brooke Army Medical Center
- Keller Army Community Hospital
- Madigan Army Medical Center
- National Cancer Institute
- Naval Medical Center San Diego
- Tripler Army Medical Center
- Tufts Medical Center
- U.S. Air Force Academy
- U.S. Army Institute of Surgical Research
- Walter Reed National Military Medical Center
- Wilford Hall Ambulatory Surgical Center
- William Beaumont Army Medical Center
- Womack Army Medical Center

Geneva’s international collaborations include Landstuhl Regional Army Medical Center in Germany.

**Research Capabilities**

Geneva has supported orthopedics research within the military for over 20 years, with demonstrated expertise in the following areas:

- Basic Research
- Device Studies
- Drug Development
- Evidence-Based Practice
- Feasibility Studies
- Human Subjects Research
- Intervention Studies
- Pilot Projects
- Pre-Clinical Research
- Phase I-IV Trials
- Outcome Studies

**Indications**

- Amputation
- Blast Injury
- Bone Regenerative Therapy
- Combat Casualty Care
- Device Development
- General Surgery
- Heterotopic Ossification
- Joint Disease
- Musculoskeletal Disorders (MSDs)
- Osteoarthritis
- Pain Management
- Physical Therapy
- Post-Operative Care
- Rehabilitation
- Rheumatology
- Trauma
  - including Major Extremity Trauma
- Wound Care & Healing

The above lists are a sampling of Geneva’s research experience and are not intended to be comprehensive.

**Benefits of a Geneva Collaboration**

**Federal Grants** On behalf of our researchers, Geneva submits research applications to, and administers awards from notable grantmaking bodies including:

- Peer Reviewed Orthopaedic Research Program
- American Society for Surgery of the Hand
- OMeGA Medical Grant Association
- Orthopaedic Trauma Research Program
- Orthopaedic Research & Education Foundation
- National Institute of Arthritis & Musculoskeletal & Skin Diseases
- Directorates of the United States Army Medical Research and Materiel Command
- Triservice Nursing Research Program

**Clinical Trials** Geneva partners with biotech firms, pharmaceutical and device manufacturers, and CROs of all sizes in pursuit of research. Our strong past performance in orthopaedic research adds value to collaborators when responding to requests for proposals.

**Educational Opportunities** Geneva offers a variety of educational opportunities to the military medical community. Our capabilities include hosting large national conferences, managing educational accounts, and accepting gifts on behalf of federal sites.
