SUPPORT  
SERVICES

The Geneva Foundation is a 501(c)3 non-profit organization that advances military medicine through innovative scientific research, exceptional program management, and a dedication to U.S. service members and veterans, their families, and the global community. Geneva is proud to have over 25 years of experience delivering full spectrum scientific, technical, and program management expertise in the areas of federal grants, federal contracts, and industry sponsored clinical trials.

Geneva provides program and contract management support for federal contract awards, including multisite domestic and international programs. This support includes, as examples, employing personnel to develop mobile telehealth applications to serve the healthcare needs of service members wherever they are, developing medical technology for combat use, providing personnel services to operate a human subject research regulatory department, and supplying experienced research personnel to military treatment facilities and federal laboratories.

Geneva's federal contract portfolio includes a variety of contract vehicles with large, diverse teams of partners. Geneva is able to act as the prime contractor or the subcontractor, depending on the needs of the program and what results in the best solution for the customer.
